

AMENDMENTS TO THE CLAIMS

⁵
1-2~~6~~. (Cancelled)

R 126
26. (Currently Amended) A method in a computerized system of providing one or more personal use items for expected use by a user to one or more destinations to which the user intends to travel, the personal use items being provided by a plurality of suppliers able to deliver the personal use items to the destination within a time frame set by the user, the method comprising the steps of:

determining by the user the personal use items needed at the one or more destinations and to be packed in a suitcase;

describing in at least one databases accessible via a network, each of the plurality of destinations to which the user can travel, each of the plurality of participating suppliers at each of said destinations, and personal use items offered by said suppliers at each of said destinations, said description of personal use items being provided by means of spoken words;

selecting a destination, personal use items, and a user's time frame, and special labeling instructions presented in Braille or other tactile reading method;

generating at least one list of said selected personal use items picked from the plurality of items according to user's preferences, said user's time frame, availability of said personal use items, and ability of a supplier to deliver said personal use items to said destination within said user's time frame;

eliminating the personal use items contained on the at least one list from those items to be packed in the suitcase; and

said suppliers providing said personal use items to the destination within said user's time frame, and with said special labeling instructions.

27. (Previously Presented) A method as in Claim 26, wherein said database further includes a description of destinations previously visited by said user.

28. (Previously Presented) A method as in Claim 26, wherein said database further includes a history of items previously requested by said user.
